

Rotary Potentiometers

We offer a wide variety of rotary potentiometers with different operating angles and in different configurations. Our potentiometers are Swiss made and of exceptional quality and reliability.

While most of our potentiometers are standard products, we also offer custom versions.

Please contact us with your detailed requirements and we will assist selecting the correct potentiometer for your needs.

Key Specifications:

Key Types:	DP20 / DP 40 / DP 70 / DP 120
Actuation:	Up to 355°, Continuous Rotation, With or without detents
Accuracy:	+/- 5%
Resistance:	5kΩ standard (others on request)
Technology / Connection:	Potentiometer/ Conductive Plastic / Wound / Solder or Plug (DP 140)
Knobs:	Standard or Custom Knobs
Duty-Cycle:	Over 5,000,000 Activations
Temperature Range:	-20°...+105°C / -4°...+221°F
